EXPERIENCES

Office Solution AI Labs Product Designer (UI/UX)

I lead end-to-end product design for a portfolio of enterprise GenAI platforms. I integrated complex analytical frameworks into Decision Pulse AI to reduce executive decision-making time by 35%, and spearheaded the UX strategy for GEN Flow to cut technical setup times by 25%. Additionally, I architected error-detection interfaces for Pulse QA that boosted diagnostic accuracy by 20%, and engineered the user flows for Pulse Convert to achieve a seamless 75%-90% visual migration parity.

July 2024 to Present | Bengaluru, India

The PDF Bee Junior UX Designer

I executed foundational user research and comprehensive usability audits for fintech platforms, leveraging data-driven insights to refine core user flows and increase task completion rates by 15%. I constructed high-fidelity prototypes and detailed interaction specifications in Figma, reducing engineering development cycles by 20% through transparent design hand-offs and collaborative alignment reviews.

September 2023 to June 2024 | Bengaluru, India

Blenzy Graphic Designer

I produced high-impact visual assets and comprehensive brand identities tailored for e-commerce and financial services ecosystems, scaling design consistency across more than 50 digital marketing campaigns. I successfully upgraded multi-channel visual assets, boosting target user engagement by 12% through structured, strategic brand storytelling.
